## Experience

|                                                                                                                                                                                                                                                                                                                            |                             |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|
| <b>Web Developer — DIGISAMAKSH</b>                                                                                                                                                                                                                                                                                         | <i>June 2025 – Aug 2025</i> |
| <ul style="list-style-type: none"><li>– Built a full-stack web application using Angular and Node.js.</li><li>– Improved user engagement by 30% and reduced page load time by 40% through optimized APIs.</li><li>– Collaborated with the development team to improve UI responsiveness and backend performance.</li></ul> |                             |

## Skills

|                                                               |                                                           |
|---------------------------------------------------------------|-----------------------------------------------------------|
| <b>Technical Expertise</b>                                    | – <b>Databases:</b> MongoDB, MySQL, DynamoDB              |
| – <b>Frontend Development:</b> React.js, Angular, HTML5, CSS3 | – <b>Cloud Technologies:</b> AWS, Azure                   |
| – <b>UI Frameworks:</b> Bootstrap                             | – <b>Development Tools:</b> Git, GitHub, VS Code, Postman |
| – <b>Backend Development:</b> Node.js, Express.js             | – <b>Deployment Platforms:</b> Vercel, AWS EC2 Instance   |
| – <b>Programming Languages:</b> Python                        |                                                           |

## Projects

|                                                                                                                                                                                                                                                                                                                                                                                                        |                         |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|
| <b>Smart File Storage with Chunk Upload and Zero Knowledge Encryption</b>                                                                                                                                                                                                                                                                                                                              | <i>Capstone Project</i> |
| <ul style="list-style-type: none"><li>– Built a secure file storage system with chunk-based uploads for efficient large file transfer.</li><li>– Implemented zero-knowledge encryption to ensure complete user data privacy.</li><li>– Integrated AWS services including S3, DynamoDB and KMS for secure storage and encryption.</li><li>– Tech Stack: React, Python3, AWS S3, DynamoDB, KMS</li></ul> |                         |

|                                                                                                                                                                                                                                                                                                                                                             |                   |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| <b>AI Based GD Platform</b>                                                                                                                                                                                                                                                                                                                                 | <i>Full Stack</i> |
| <ul style="list-style-type: none"><li>– Developed a real-time AI powered group discussion platform for students.</li><li>– Implemented machine learning analysis to evaluate discussion quality and participation.</li><li>– Designed a responsive frontend UI for better user engagement.</li><li>– Tech Stack: React, Python3, Machine Learning</li></ul> |                   |

|                                                                                                                                                                                                                                                                                                                                                                                                                                      |                 |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|
| <b>Interactive Course Dashboard</b>                                                                                                                                                                                                                                                                                                                                                                                                  | <i>Web Tech</i> |
| <ul style="list-style-type: none"><li>– Designed and developed a structured course dashboard with organized learning modules and intuitive navigation.</li><li>– Implemented progress tracking features to monitor course completion and learning milestones.</li><li>– Built a responsive interface optimized for both desktop and mobile devices using Bootstrap.</li><li>– Tech Stack: HTML, CSS, JavaScript, Bootstrap</li></ul> |                 |

## Awards & Achievements

---

- **All India NCC Trekking Expedition Camp 2026**
- **Hackathon 2026** — Centurion University
- **Smart India Hackathon 2025** — Successfully qualified the first evaluation round.
- **18th National Scout and Guide Jamboree 2023** — National level participation, Rohat, Rajasthan.

## Certifications

---

- **AI Agent Workshop with UiPath** — GeeksforGeeks & UiPath
- **AWS Cloud Technical Essentials** — Coursera
- **Generative AI Model Workshop** — NxtWave
- **GeeksforGeeks CUTM Training Program** — Centurion University
